

# 2nd Quarter Planning

The only business session that helps translate your business plan to a working plan of action for consistent growth and development

## Create Your Own Economic Stimulus Package

Today, nothing plays a greater role in the success or failure of your company than execution. And if you are going to succeed in today's ultra competitive climate, you've got to find the gap between what you want to achieve and your ability to deliver. Not simply tactics, but a system of getting things done through questioning, analysis and follow through.

### What you must do today

- get uncomfortable with the speed of technology that is capturing your market.
- look for what new skills will take you to the next level.
- rethink your business model to answer the changing marketplace.
- get paid what you are worth.
- make a greater impact on your market, give greater value.

### Take the right steps now:

- re-evaluate your goals – are they big enough?
- transform ideas to reality
- understand the Critical Success Factors for Growth
- see better profits from more focused plans
- enjoy the experience of learning from others
- create a contract with yourself that results in immediate action
